Advanced Cloud-based Malware Scanning from Comodo

Best pro-active defense on the market – acts like a visitor to find issues on your website before your customers do.

OVERVIEW

Cloud-based malware scanning and trust seal for your business website

Web Inspector is a cloud-based service that inspects your website for malware, detects attack vulnerabilities, and protects your website from thousands of security threats, daily! Comodo acts as a visitor to your site to attack it in the cloud, and find issues before your customers do. This proactive defense, rated the best in the industry, helps keep your site clean, safe, and avoid search site blacklists.

As a bonus, complimentary PCI compliance scanning is included with the paid product. A completed and passed scan validates ecommerce and merchant websites accepting credit card payments, to keep them compliant with the payment card industry's mandatory standards.

Comodo's Web Inspector provides

- ✓ **Best Proactive Defense** against **Malware Attacks in the Industry**
- ✓ **Blacklist Monitoring**
- ✓ **Comodo Trust Seal Display**
- ✓ **Daily Automatic Malware Scanning**
- ✓ **Immediate Notification of Issues**
- ✓ **Complimentary PCI Approved Scanning for Retail Websites**
- ✓ **Cloud Scanning and Web-based User Interface**
- ✓ **Competitive Price**

FEATURES

Daily Malware Scanning: Each time Web Inspector scans your website, it makes sure that no known viruses and malware have been injected. Cyber criminals may exploit the web browsers of visitors or use keylogging to steal confidential information like credit card numbers and passwords, or they may download malware to visitors' computers. In addition, the pages or advertisement links on your site may be co-opted to redirect to malicious sites.

Blacklist Monitoring: This feature checks daily, to make sure your website is not blacklisted by major search engines, such as Google.   If it is, we automatically notify you to help remove your site from blacklists.

Continuous Monitoring: Web Inspector continuously learns and monitors the web to stay one step ahead of hackers and threats to your website by keeping a repository of

already known and latest threats. Every time it scans your website, it makes sure to check your website against these threats. Hackers use a wide variety of cross-site scripting (XSS) techniques to invisibly insert malicious code on target websites and may use served ads as a delivery mechanism.

Immediate Problem Notification: Immediate notifications are sent via email, if a problem is discovered. This dramatically reduces the time between problem identification to problem resolution and limits damage to your business' reputation.

Trust Seal: The Web Inspector Trust Seal communicates that your website is safe, secure, trusted and verified, which will give customers the confidence to browse and buy on your site.

PCI scanning: PCI compliance scanning is included in the product to validate ecommerce websites that accept credit card payments. This is an approved PCI scanning tool, included in the product at no extra cost.

No software downloads. No complicated set up: Web Inspector is a cloud service that runs remotely from secure servers managed by Comodo, so the user is not required to install software on their machine or network. Account management is done via our 100% online interface.

Focus on your customers: With Web Inspector monitoring your website for malware, you and your staff can get on with the more important task of growing your business.
